

Bathroom Cleaning Tools Fact Sheet

A haven for mildew, scum and hairballs, the bathroom is likely to be the least favorite room to clean on anyone’s chores list. Worst of all, it is one of most frequently cleaned rooms; seventy percent of consumers clean their bathroom at least once per week (Rubbermaid Awareness & Usage study). Consumers typically use sponges or disposable wipes – and sometimes both – to clean their bathrooms leaving them frustrated as they try to clean hard to reach places and balance spraying chemicals and wiping at the same time. Rubbermaid has made cleaning the bathroom easier by providing clever solutions to common bathroom cleaning frustrations in its new line of bathroom cleaning tools.
